

**INCLEMENT WEATHER**.... Fortunately, it doesn't happen often! But when it does, sometimes curbside recycling routes must be cancelled for the safety of all concerned.

When routes are cancelled, please note the following:

- Once cancelled, there will NOT be a makeup day.
- Please hold your materials until your next regular collection, or bring them to your local convenience center or waste management site. Please call us at 757-259-9850 if you need more information on these locations, or check your city or county website.

If the weather is or has been bad but routes are still running, our contractor will make every effort to service your bin. If for some reason they are not able to do so, then please hold your materials until the following week, or bring them to your local convenience center or waste management site. Many times side streets or back streets are in much worse condition than the main roads.

Recycling trucks don't carry the weight of a garbage truck, so they may not be able to get down some of the streets that the garbage trucks do. We will do our best to post service updates on the scrolling marquee on the curbside recycling page of the VPPSA website.
